## GIA Volunteers Trail Maintenance Reimbursement Policy

Volunteers will receive reimbursement for travel and ATV mileage while volunteering for GIA trail maintenance. This reimbursement will be paid out based on rate equivalent to mileage reimbursement received from DNR. DNR calculation of mileage reimbursement formula is 90% of Federal maximum mileage rate which is modified yearly based on Federal formula criteria. SMATV does not have any input into these formula calculations.

Volunteers will also receive reimbursement for labor at a rate equivalent to 50% of SMATV received reimbursement from DNR. This reimbursement is capped as to not exceed legal tax exempt allowable maximum labor based on Federal guidelines. This maximum tax exempt reimbursement also has to take into consideration labor funds received from any and all other SMATV volunteer programs. SMATV will calculate total volunteer labor reimbursement as to not exceed Federal tax exempt guidelines.

SMATV volunteer reimbursement will be capped as to not exceed GIA reimbursement received from state in said calendar year.

SMATV will disperse said reimbursement in timely fashion as to not exceed one month of club receiving GIA funds from state.

SMATV reserves the right to adjust and modify these calculations at their discretion as deemed necessary.
